Your Business With Us

Sepidan Osareh Jonoob Co.

is proud to obtain the following certifications for observing the European Standards in factory products.

**Exemplary Exporter
I.R.Iran 2020-2021**

ABOUT US

Sepidan Osareh Jonoob Company is one of the biggest producers & exporters of licorice products in the world.

Our company is a very reliable source of supplying licorice extract Powder, Blocks, Granules, Paste (Liquid), DGL and related products.

Our production capabilities are 20 metric tons of either Blocks or Powder per day.

Our modern production facilities can supply you with premium grade products according to your needs and requests.

As a supplier we feel responsibility both environmentally & socially and we are dedicated to satisfy our customers needs.

As a matter of fact we welcome buyers to visit our factory & we would gladly adapt to the potential buyers guidelines & specification upon signing contracts.

We are proud to announce that in recent years we have established a licorice factory in the Republic of Azerbaijan.

We offer excellent quality with competitive market prices, having a long history of exporting to Europe such as Germany, Italy & Denmark, Asia, Latin America & other parts of the world.

For accreditation of our achievement , Sepidan Osareh Co. is prouded to be nominated in 2020 as a unique Iranian exemplary exporter company for obtaining the European quality management standards by reputable *CBI Europe* a subsidiary of Netherlands Enterprise Agency, which was founded by Netherlands Ministry of Foreign Affairs.

Inside the Factory

By using the most modern and the most specialized machinery in the factory production lines, Sepidan Osareh Co. has succeeded to produce various types of high quality licorice products in huge amounts in the Middle East region. To achieve this goal, the company has installed machinery in production lines like: Extractors, Filtration system, Evaporators and Spray - Dryer system.

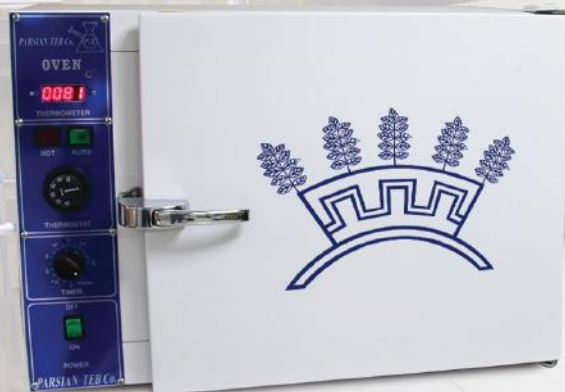

LABORATORY

Sepidan Osareh Jonoob Co. has a modern laboratory. It is equipped by the most modern & advanced devices. Our specialists test the samples according to the 2343 standard.

The specialists analyze the produced samples with the most advanced and up-to-date HPLC device.

Licorice extract blocks packing

After production and before getting cold, the product will be lined up in 5 kilograms molds. Then they will be wrapped in nylon covers, conserving the net weight of 5 kilograms. In the second phase every five molds will be sorted in a carton box, totally 25 K.G weight, ready for export to international markets. All the packing activity is done by skilled manpower and machinery, according to European standards.

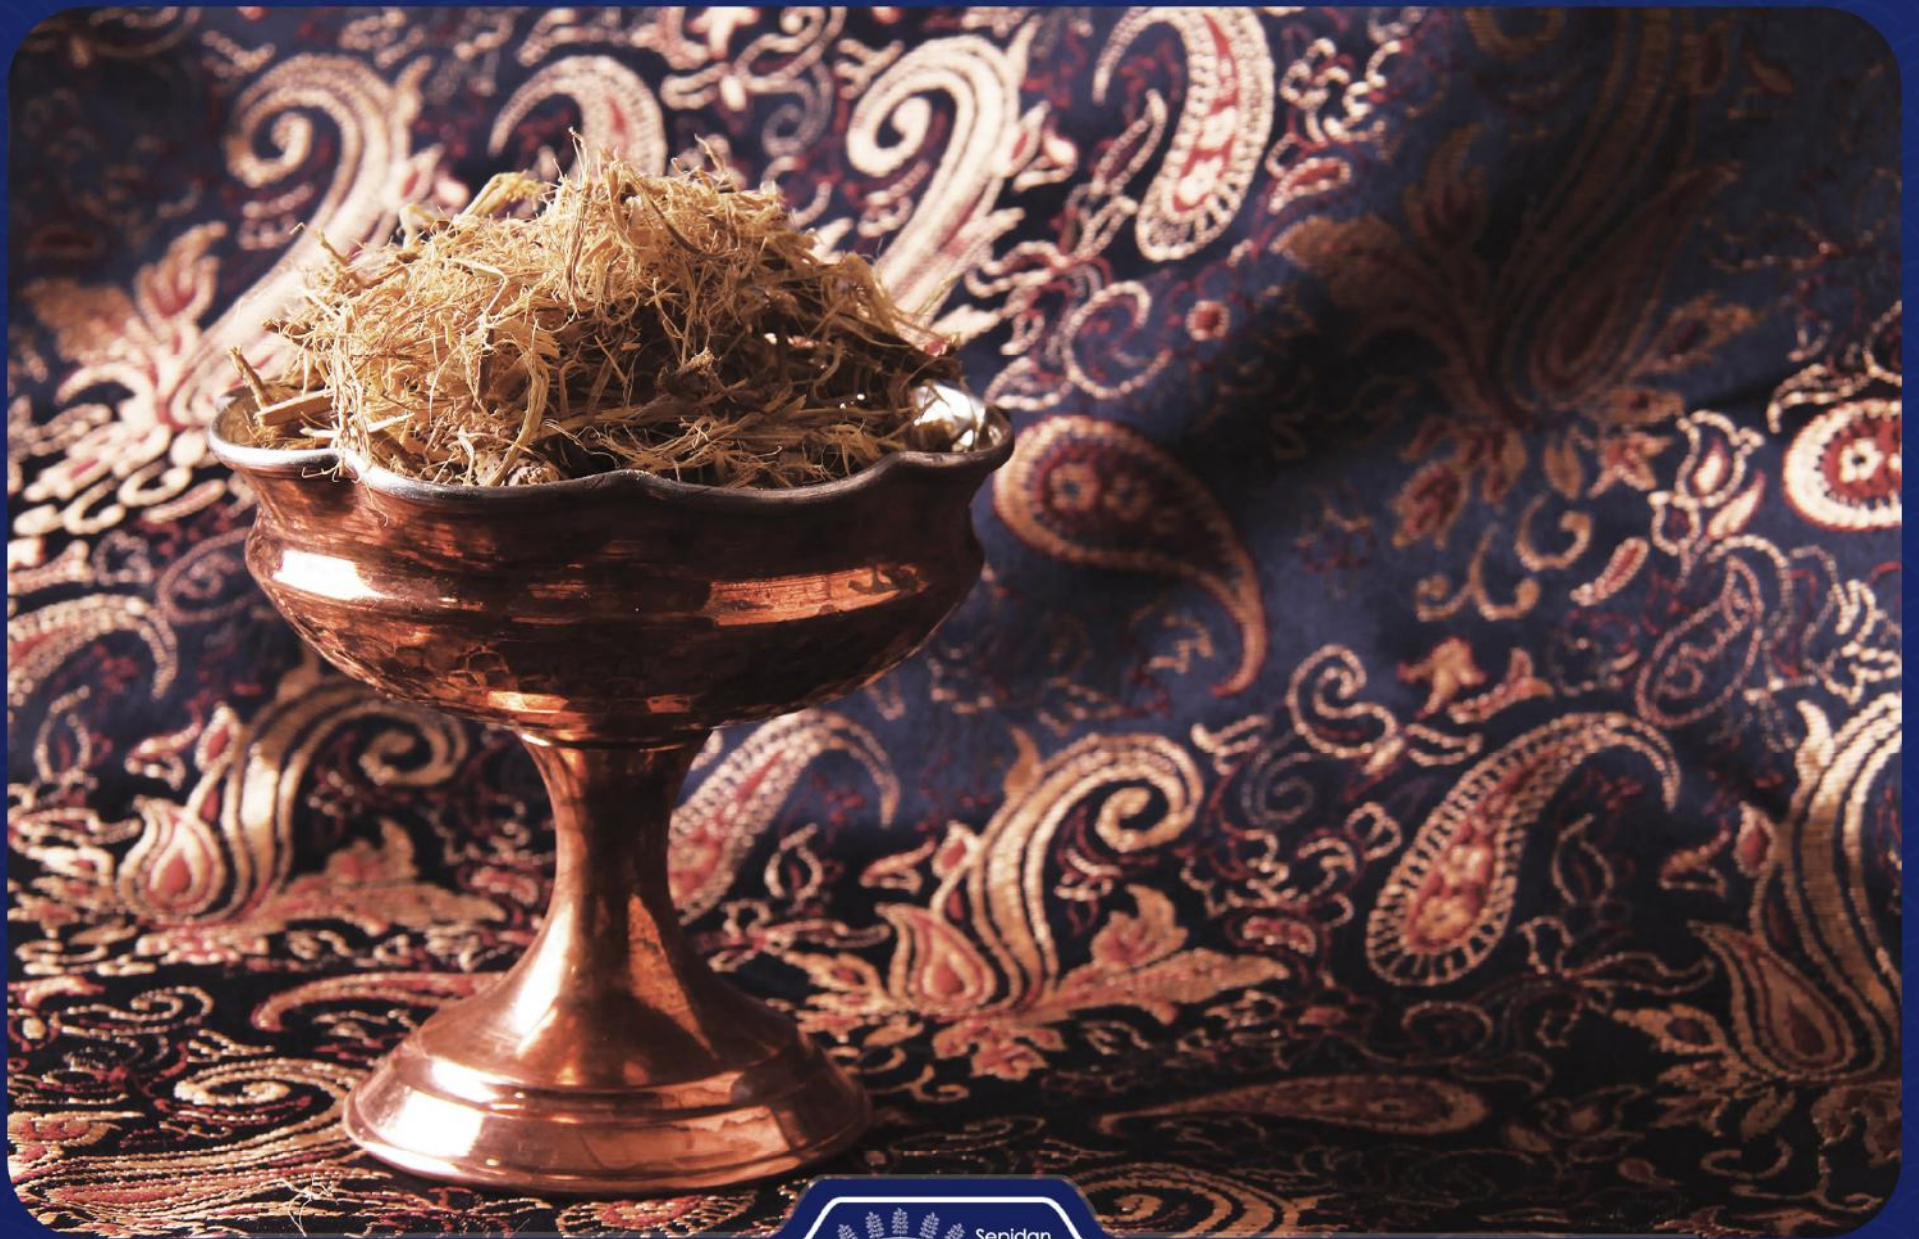

Licorice extract paste packing

Licorice extract paste has a very flexible texture. Because of this property, Sepidan Osareh Jonoob Co. chooses the convenient food container barrels which are very beneficial in packing process in order to keep the form and taste of the product. The fifty kilogram sealed barrels are sorted in factory mechanized warehouse according to European standard, waiting to be exported to the international markets.

Licorice extract powder packing

Once the licorice extract powder is put in 25 kilogram nylon sacks, the top part will be sealed and packed consequently in the composite bags. However it might be packed differently, both in size and volume according to customer request and standard. The packaging process is highly observed by European standards.
